A few words - by August L. Kern

Besides the ability to manufacture sportive chronometers (and also complicated jewel watches set with precious stones) the company KERN shows an almost inexhaustible creativity developing new product lines in which the tradition and elegance are always taken into account.

For more than thirty-five years perfection and exclusiveness are our company`s basis and their significance will remain in future to match our sophisticated customers` and to meet the expectations put upon us. Correctness, flexibility and innovation are capitalized with us and will guarantee the international success of the brand of KERN further on.

Committed to tradition

The watch manufacturing company KERN was founded on 1st October 1974 by the master engraver and designer August L. Kern and has been led under his management since then. The qualified education and ideals of the founder are substantially responsible for the development of the product lines and the company success of KERN. In order to ensure the future of the brand and to remain the business in family property his son, Stefan Kern, entered the group in the year 2000 and is responsible for sales and marketing ever since.

For more than thirty-five years jewellery and timepieces of highest quality have been manufactured at KERN and marketed internationally under this name. Specially selected

precious stones and diamonds as well as Swiss movements and components of highest quality are exclusively used for our products. In connection with innovative design these elements give our products unmistakable character and significance.

Since the foundation of our company the product assortment has been developed continuously and new models have been added considering newest arts of manufacturing to be able to present a high-quality program with more than 650 watch variations to our specific circle of customers. In order to extend the already available collections of 18kt gold watches, the production of exclusive stainless steel watches with precious stones and diamonds was started in 1995 and driven forward ever since.

It's not all about innovation

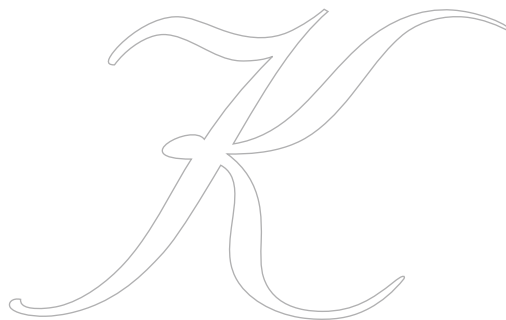

Perfection, exclusiveness and individuality are at first place at KERN and are the basis for all our products. Starting from conception and further development up to presentation specific procedures for the backup of the quality and reliability are used in order to guarantee these basic principles. The harmonious connection of most modern technologies, best Swiss manufactured movements as well as innovations with traditional basic ideas and manual skill is of course a matter at KERN.

The passion of the employees for the watchmaker's art and the love of detail which both are not to be replaced by supporting technologies and machines is the most important good of a watch manufactory.

Another constituent of our philosophy contains the long-standing cooperation's with leading Swiss suppliers and partners who also contribute to the high quality standard of our products. You, our customer, are in the center of all our efforts. Due to our flexibility it is possible to adapt existing models to individual customer's wishes to obtain a personalized product.

In order to take both your and our own high claims into account, we attach great importance to the careful selection of our worldwide representatives. The watch collection of KERN with its various limited editions and special models therefore is distributed exclusively by certified dealers so that experienced customer advisory and on-site services are ensured.

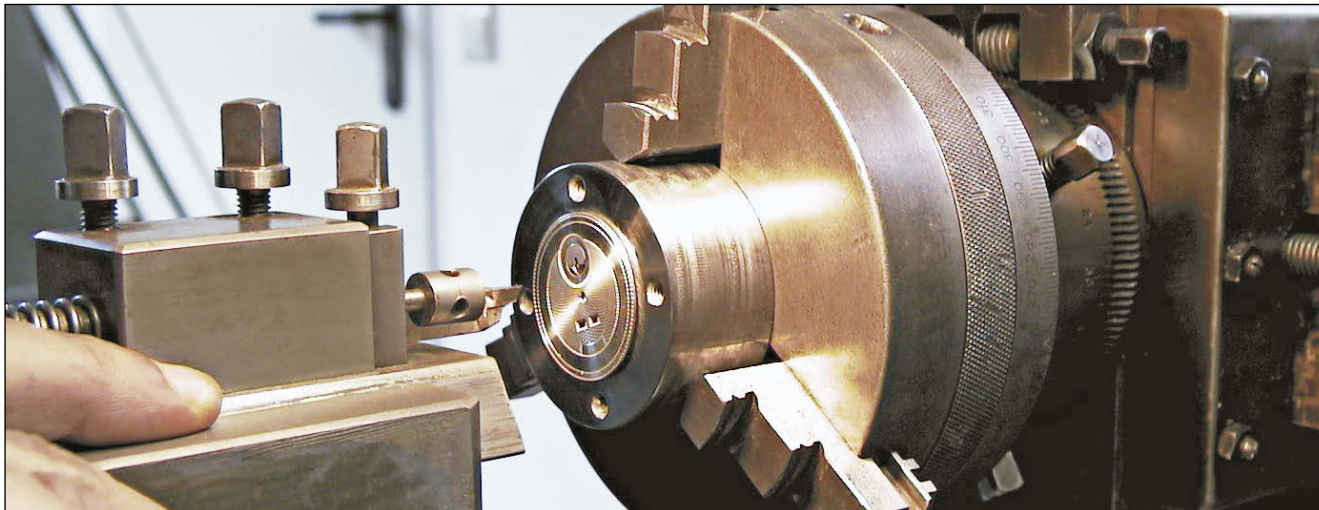

The art of dial guilloché

Guilloché is a very old and traditional craft which was developed by the Frenchman Guillot more than two centuries ago and is practiced only by few specialists in this unchanged way until today. With this precious art (there are similarities to engraving) regular patterns and ornaments from straight and curved lines are made by hand onto metal surfaces with special tools.

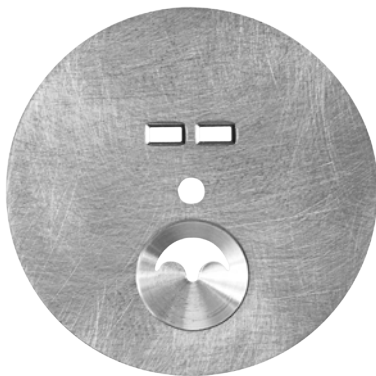

Due to the filigree work and fineness of the faces to be worked on long-standing experience and high dexterity are necessary to elaborate elegance perfectly.

The conception of a guilloché dial requires sound knowledge about this adornment technique so that the result has all desired visual attributes.

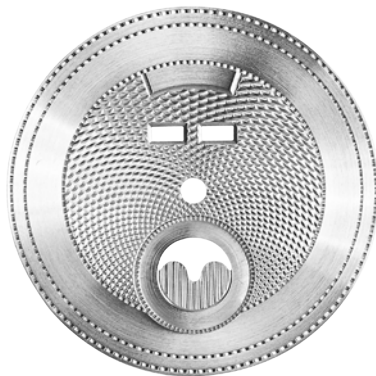

At KERN technical details are designed with support of CAD- and 3D- procedures and their realizability is checked repeatedly. Executed with great care the guilloche work starts with the manual setting-up and positioning of the silver dial on the lathe. To complete a sophisticated and effortful dial more than two

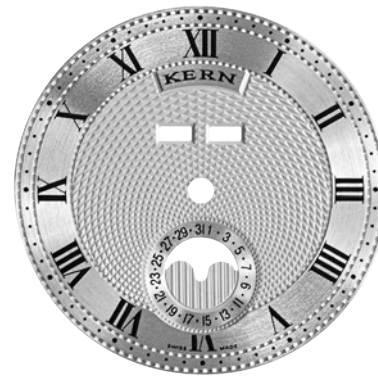

hundred single operations are needed which require a long time to be correctly executed. A perfect unicum which underlines the individuality of the future owner of the watch stands at the end of the demanding work of the Guillocheur.

basic sterling silver dial

dial after hand guilloché on rose engine

final dial with prints

In celebration of our 30th anniversary KERN presented the special collection “Jubilee”. Each watch model of this collection is decorated in an exclusive and elaborate way of watchmaking, to point out traditional watchmaking skills. By Hand guilloche dial on rose engine, flame-blued hands and screws, circular-graining, satin finishing, hand sewn alligator leather straps, diamond setting by hand, skeleton automatic movement with hand engraved ornaments are delighting hallmarks of quality and therefore carried on.

Driven by creativity and perfectionism we spent several months with all motivation in our development for a new model. During this period, different test phases and prototypes are manufactured to present finally perfect quality timepieces. Our technical environment with modern 3D systems and machines can only support the traditional craftsman but it will never replace them.

KERN

COLLECTION - SERIES

FALCON LINE

The tradition, love and passion to falcons and the falcon hunting sport in Arab countries was the inspiration to develop this watch edition and to register as a patent. Authentic falcon feathers have to be prepared through a special and work-intensive procedure before they are used in our jewellery and watches. Each merchandise is a unique piece as no feather is identical to another.

Ref. 4399-2219-W

18kt white gold chain with 18kt white gold pendant set with 68 diamonds (1.48ct), 24 tsavorite tapers (2.59ct), 8 ruby tapers (1.49ct), sapphire crystal, water resistant (1 ATM), screwed backside with engraved falcon, authentic falcon feather inside.
